Benoît Ortalo-Magné

FULL STACK DEVELOPER | Creating AI-Enabled Web Experiences

Davis, CA • (608) 770-7617 • benoiteomi@gmail.com • linkedin.com/in/bo-m • **benoiteom.com**

EXPERIENCE

CHARTERUP | Full Stack Web Developer — FEB 2022 - PRESENT

- Leading role with responsibility working on frontend, backend, and infrastructure, contributing to designs, refining stories, managing sub-teams of developers, onboarding new hires, and resolving customer feedback
- Developed prominent features including authentication, live tracking display, payment processing, external API integration, custom emails, invoices, PDF generation, and interactions between web and mobile apps
- Proposed and investigated AI technologies, trialing newly released features and educating peers
- Deployed an internal MCP server with various tools to assist other developers using FastMCP
- Secured company systems by implementing a site-wide auth service with flexible roles and permissions
- Enforced ongoing code quality by establishing unit tests, writing over 500 tests to clear the backlog

TCS | Software Developer — MAY 2021 - FEB 2022

- Led a team of new grads to first place in the training competition, then provided Java app support for clients

OCULO.AI | Software Developer — APR 2020 - JUN 2020

- Built an internal image-processing Python tool featuring drawing overlays, undo functionality, save and resume, and export to file to accelerate the product pipeline

TENEEZ | Cofounder — NOV 2019 - JUN 2021

- Led a team of developers handling frontend, marketing efforts, and ads to reach over 40,000 users
- Placed 2nd at the College New Venture Challenge and participated in the Chicago Polsky Accelerator in 2020

PROJECTS

WAYFINDER.AI | wayfinder.benoiteom.com — MAY 2025 - PRESENT

- Designed and developed a travel website with AI assisted destination info, itineraries, trip sharing and more
- Integrated the Gemini AI API for an enhanced AI chat and an agentic itinerary planning flow

BLACK & WHITE | blog.benoiteom.com — JAN 2025 - FEB 2025

- Designed and developed a lightweight blog platform using an open-source WYSIWYG editor, featuring image uploads, folder organization, comments, private pages, and AI integration for writing help
